COPPER SERVICE SADDLE SPECIFICATIONS

The saddles are made of $\frac{1}{4}$ " copper bar with WROT male fitting adapter outlets. Nitrile o-rings are used for a dynamic seal.

The two halves of the saddles are secured around the pipe with stainless steel hardware.

The Nitrile o-ring has excellent resistance to petroleum-based oils and fuels, water and alcohol. Its temperature range is -30 degrees to + 180 degrees. The saddles can be used in systems up to 300 psi.
